on as they are uttered they FARM AND HOUSEHOLD.

WHAT THE FARMER'S STABLE OUGHT TO BE.

cattiful Stables Far Too Few-Manoy to He Made From Nata-Breed-ing Turkeys-Farm Notes and Home Hints.

Healthful Stables. Farmers' stables are rarely conare usually deficient in light, ventilatarly when some people tall one are likely to result. Want of light or light in straggling rays from various light in stranging rays from various a small inlets injures the eyesight, and sufficiently powerful to counteract or where there is in-afficient light, there to influence in modifying the constitution. Stables thus closely built do more or less in the case of the common admit of free circulation of air, more four transmit good and deconsequently thay become filled with feetive qualities dependent upon their four air, impregnated with the panatate of health and condition during

his is what he says:

"I have used your preparation alled Augus' Flower in my family or seven or ight years. It is contained in the site should be well-drained; this would be well if done in any case.

"Where no other than an earth floor is had, absorbents should be used in abundance of the stable be a low, close one. But it is better to have ever used or known. My wife is roubled with Dyspepsia, and at it mess suffers very much after eating. The floor should have a slight inclination from front to rear, the same between the plants covered while other masks to plants and as it is not in the original flavor of the milk, solid material, do well emough. The floor should have a slight inclination from front to rear, the same between the plants covered while other masks between the plants covered while other masks be presty noarly uniform care of mask be presty noarly uniform care of masks be made and muscle. It is seen that proper food and care are that proper food and care that the stee that an an earth floor is about fast the stee that an earth floor is about fast the stee that an earth floor is a seven that proper food and care are that the stee that an earth floor is about the head then the masks. The second that the st he August Flower, however, reeves the difficulty. My wife freuently says to me when I am going
to town, 'We are out enstipation of August Flower, ry off the liquids to the manure pile, and I think you had it a good and lasting floor be desired, the grant of the gr oubled with Indigestion, and when-ter I am, I take one or two tea-a few inches inclination to the rear with drains to serve the purpose of carrying off the liquids. The following method makes a good concrete

> in depth, fill in with course gravel; smooth this off to a proper grade, say four inches in ten feet. Upon this put small stones—cobble stones—and four trace and the cream river and the cream put small stones—cobble stones—and for the company of press down solid making drains where required. Over this when raised up sufficiently high and firm, spread a layer of mortar, press in the top of time and in needed will be developed prount it is a this, when half dry, some sand, and to add to the thickness and durability of the floor, more mortar and sand may be put on; instead of mortar, some tendence of the following companies to the following companie some use gas tar, then finish off with sand. Stables are often built too law, or in other words the left or floor overhead is put down too low. This atlon whose purpose is to belp all foor should be at least eight feet farmers, when it is headed and run by high; it gives better ventilation, and instead of letting the light and air struggle in as best it may through small spectures, there should be made one or two long windows reaching well up to the celling or upper floor. The sash in them should be swung on pivots in the middle, so that the sash seek as a specialist of the poor condition of the milk market to day.

trees and immense profits from established orchards, have attended much interest in growing the soft shelled Texas pecan, which is equal in quality to the best imported nuts of any kind. These are already raised to quite an extent in Texas, and, while the industry is in its infancy, enough has already been demonstrated to show that to the best imported outs of any kind. These are already raised to quite an extent in Texas, and, while the industry is in its infancy, enough has already been demonstrated to show that the profits are far ahead of grange growing. In fact, the United States Department of Agriculture considers it of such importance that it has discovered by the such considers it of such importance that it has discovered a disagreement a disagreement and suggreened and suggested and continue of a wine glass, pour the oil and the some of the juice on the edge of the glass. growing. In fact, the United States Department of Agriculture considers it of such importance that it has direc-ted special attention to the subject, and a bulletin will be issued detailing Watch Out! Collar.

Seed by and a bulletin will be issued detailing the results in the near future. Callfornia freit growers have made fortough Remedies, but there is equal to those which can be made by pean raising. An acre of the large soft-shelled pecans at eight years old will, if bearing one peck per tree, earn at least \$100 per acre, which makes the amount for the remoing value of \$1,000 per acre. At ten years old the yield will be from one to three bushels per tree, earning \$20 per tree or \$720 per acre. At fifteen years they should and done, the best advice is, "Try not to get apolts on your clothes."

The best way of rinding a liquid of the best way of rinding a liquid of the per tree trees. There may be other good form freit growers have made for around for a minute or two, whom it will be found that all smell or taint of the count that all smell or taint of the soft-shelled pecans at eight years old will, if bearing one peck per tree, earn at least \$100 per acre, which makes the amount for the running value of \$1,000 per acre. At the realing per tree, earning \$20 per tree or \$720 and sunshine to many a home. It is entirely harmless, and pleasant to take, and larger bettles for the price than any other, and every bottle

as much as possible to the teament of the house so she will keep the e introduce and as no she may and there need be no truthe. Table less should do still better
